

TAURUS-P™ Cage

A comprehensive system for Transforaminal Lumbar Interbody Fusion

- Allows solid fusion on both anterior and posterior portion of spine in a Single Surgical Approach
- Larger surface area is available for an enhanced bone graft
- Provides effective restoration of space between the vertebral bones and the space around the existing nerves in the neural foramen.
- Offers anatomical biconvex shape to fit the anatomy of vertebral body.
- Teeth on the superior and inferior surfaces provides initial stability and reduce migration.
- Tantalum markers ease visualization and implant placement verification on X-Rays.
